Portfolio: Syab.tech | linkedin.com/in/syedsyab

PROFESSIONAL SUMMARY

Senior Full Stack Developer with 4+ years of experience architecting, building, and shipping production web applications across diverse industries. Expert in Python backend development (Flask, FastAPI, Django) and React.js frontends, with deep command of PostgreSQL database design, REST API architecture, JWT authentication, role-based access control, and Docker deployment. Delivered 10+ complete client and product applications end-to-end — from system architecture and database schema through frontend UI and cloud deployment — as sole technical owner. Additional expertise integrating AI and LLM capabilities (OpenAI, Groq, LangChain, RAG) directly into production web products. Strong track record of rapid delivery: shipped two full SaaS products in under 3 days each. Active GitHub with 252 repositories and two published Python packages on PyPI. Based in Riyadh, Saudi Arabia with a transferable Iqama.

TECHNICAL SKILLS

Frontend: React.js, NextJS, JavaScript (ES6+), TypeScript (basic), HTML5, CSS3, Tailwind CSS, Vite, Responsive Design, UI/UX Implementation, Figma, Recharts, Leaflet.js

Backend: Python (primary), Flask, FastAPI, Laravel (PHP), Node.js (basic), REST API design, GraphQL basics, Microservices, Webhooks, Background workers, Kafka

Database & Storage: PostgreSQL, MySQL, MongoDB, Redis, Firebase, Supabase, pgvector, Schema design, Query optimization, Database migrations, Full-text search, Vector search

Authentication & Security: JWT, OAuth2 basics, Role-Based Access Control (RBAC), Secure API design, CORS, Input validation, Environment secrets management, OWASP basics

DevOps & Cloud: Docker, Docker Compose, GitHub Actions (CI/CD), AWS S3, Railway, Vercel, Multi-environment setup (Dev/Staging/Prod), Linux, Bash scripting

AI & LLM Integration: OpenAI API, Groq API, Anthropic Claude, LangChain, Crew AI, LangGraph, RAG pipelines, Semantic search (pgvector, Sentence Transformers), Chatbots, AI-powered features

Testing & Quality: Unit testing, API testing (Postman), Code reviews, CI/CD automated testing, Error monitoring, Production logging

Tools & Workflow: Git, GitHub, Cursor AI, Claude Code, Postman, Figma, Jupyter Notebook, VS Code, Agile/Scrum, Jira-style sprint delivery

WORK EXPERIENCE

Founder & Senior Full Stack Developer | MenteE (AI SaaS Startup) — Remote

Jun 2021 – Present

- Sole technical architect and developer across 5+ production SaaS products — owning system architecture, database design, backend APIs, frontend dashboards, authentication, third-party integrations, Docker containerization, and CI/CD deployment for every product.
- Built RecruAI — a full stack AI recruitment platform: multi-role React.js dashboards, Flask REST API, PostgreSQL with optimized schema and RBAC, JWT authentication, Docker deployment, GitHub Actions CI/CD, and AI-powered interview and matching features — serving real users in production.
- Architected and delivered StitchPoint — a complete e-commerce platform with React + Vite frontend, Flask + PostgreSQL backend, three-tier RBAC (customer/manager/super admin), Recharts analytics dashboards, Leaflet map integration, PDF report generation, and order management workflows.
- Shipped Mockster.ai and QuickHire.ai — fully functional SaaS products with Python backend, React frontend, LLM integration, JWT auth, and production deployment — each delivered end-to-end in under 3 days.
- Established and maintained engineering standards across all products: API versioning, code review process, Git branching strategy, Docker containerization, environment management, and technical documentation.
- Integrated AI capabilities into full stack products: RAG systems, LangChain orchestration, semantic search, and LLM-powered features — all exposed through clean API endpoints consumed by React frontends.

Senior Full Stack Developer | AI3 (Startup) — Remote

Apr 2023 – Dec 2023

- Led full stack architecture and engineering for AI-powered SaaS products — Flask backend, React frontend, PostgreSQL, Docker, and LLM integrations — as sole senior technical decision-maker.
- Built a production AI document intelligence platform: ingestion pipeline, vector search, LLM response layer, REST API, and React frontend — shipped from architecture to live users.
- Managed cross-functional technical delivery across engineering, product, and business teams — maintaining code quality, sprint delivery, and technical documentation throughout.

Full Stack Developer | Suvastutech — Pakistan

Nov 2024 – Jan 2025

- Built a production full stack web service: FastAPI backend, PostgreSQL + pgvector database, semantic search integration, React-compatible REST API, and Docker deployment — full stack delivery for a live client platform.
- Designed database schema, REST API contracts, authentication flow, and deployment pipeline — end-to-end technical ownership from brief to production.

KEY PROJECTS

Req2Ops — Multi-Agent Requirements-to-Execution-Plan Engine

- Built Req2Ops — a multi-agent AI system (LangGraph + LangChain + FastAPI + Groq) that converts unstructured client inputs (PDFs, audio, Excel, screenshots) into structured project plans via a classifier and specialized planner agents, streamed in real-time. React 19 frontend, deployed on Render/Vercel.

RecruAI — Full Stack AI SaaS Platform | MenteE

2023 – Present

- Architecture: React.js multi-role frontend → Flask REST API → PostgreSQL (optimized schema, pgvector) → JWT + RBAC auth → Docker → GitHub Actions CI/CD → Railway production. AI features: LangChain interview agent, candidate matching engine, document analysis RAG pipeline.

StitchPoint — Multi-Role E-Commerce Platform |

2024

- React + Vite + Tailwind frontend, Flask + PostgreSQL backend, three-tier RBAC, Recharts analytics, Leaflet maps, PDF generation, multi-step order workflows, commission tracking — complete full stack ownership.

Laboratory Management System | Client

2023

- Enterprise web platform: Laravel + MySQL, patient registration, billing engine, test management, HL7 middleware, automated PDF reports, SMS notifications, RBAC for admin/staff/patient — production deployed for a real client.

AI Video Processing Service | Freelance Client

2024

- FastAPI microservices backend, Redis job queue, AWS S3, Docker Compose, multi-threaded GPU pipeline, automated quality scoring endpoints — 60% compute reduction, production deployed.

CakeBake — E-Commerce Web Platform | *Client*

2023

- Laravel REST backend, product customization, shopping cart, order processing, real-time status tracking, secure checkout — deployed to production for a live bakery business.

CVChat — Full Stack Rapid Delivery | *Company Project*

2023

- Django backend + pgvector + Sentence Transformers + Groq API + REST API + React frontend — designed, built, tested, and deployed to production in under 12 hours.

OPEN SOURCE & PUBLISHED TOOLS

- DataFit (PyPI) — Python data preprocessing pipeline library. Used globally by developers.
- autodatap (PyPI) — Automated data preprocessing package.
- PySnipify-ML (VS Code Marketplace) — 150+ Python and ML developer workflow snippets.
- Mockster.ai — Full stack AI SaaS interview simulator. Shipped end-to-end in 3 days.
- QuickHire.ai — Full stack AI SaaS recruitment toolkit. Shipped in 3 days.

INTERNSHIP EXPERIENCE

Frontend Developer | *Interns.pk — Remote, Pakistan*

Aug 2023 – Sep 2023

Web Developer | *LetsGrowMore & iNeuron.ai — Remote, India*

Jul 2023 – Aug 2023

EDUCATION

- BSc Software Engineering — University of Swat, Pakistan
- Relevant coursework: Software Architecture, Web Engineering, Database Systems, Algorithms & Data Structures, Security, Networks, Human-Computer Interaction.

CERTIFICATIONS

- Python Developer Bootcamp — Udemy
- JavaScript Essentials 1 — Cisco
- Introduction to SQL — DataFlair
- NumPy & Pandas — DataFlair
- Prompt Engineering for ChatGPT — Great Learning
- Basics of Generative AI — OpenWeaver
- Introduction to Git & GitHub — Gymnasium
- Data Visualization with Power BI — Udemy
- EF SET English Certificate — C1 Advanced (68/100)

LANGUAGES

- English — C1 Advanced (EF SET certified) · Professional
- Arabic — Basic reading and comprehension
